## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, and 15, drawn to an isolated peptide, classified in class 530, subclass 300.
  - II. Claims 12-14, and 16, drawn to a nucleic acid, a vector, and a recombinant host cell, classified in class 536, subclass 23.1, for example.
  - III. Claims 17-22, drawn to a method for inhibiting cellular proliferation comprising the delivery of a peptide, classified in class 514, subclass 2.
  - IV. Claims 17-22, drawn to a method of inhibiting cellular proliferation comprising the delivery of a nucleic acid, classified in class 514, subclass 44.
  - V. Claims 23-26, drawn to a method of identifying a compound capable of inhibiting cellular proliferation, classified in class 435, subclass 7.1.
  - VI. Claim 27, drawn to a molecule, classified in class 530, subclass 387.1, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1642

the instant case the different inventions differ from one another because the products are chemically and structurally different. They are used for different purposes.

3. Inventions III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ from one another because the methods are used for different purposes, and hence have different procedural steps.

4. Inventions I-II, VI and III-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products can be used for other purposes such as in the diagnosis of a disease, or in the creation of an antibody or probe. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention: If the applicant elects group I, please select one of the following: **SEQ ID No: 1 or 2**; (if SEQ ID No: 1 is chosen please select one of X1 (SEQ ID No: 3-21, LTT, TT, or T); X2 (V or L); and X3 (SEQ ID No: 22-25, AKQ, AK, A) or if SEQ ID No: 2 is chosen please select one of Y1 (SEQ ID No: 26-44, LLN, LN, or N), Y2 (SEQ ID No: 45-50, VAT, VA, or V))

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1642

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
